BI Publisher reports, using Query Report Scheduler, require the use of a Run Control, which is a slightly different process than using PS Query. The Run Control is an essential step, as it can be used time and again—with minor changes, if necessary—to generate a BI Publisher report. The following steps demonstrate how to search for and utilize an existing Run Control for the purpose of producing a BI Publisher report.

**Privacy Disclosure**

Disclosure of information from student records is governed by the Federal Family Educational Rights and Privacy Act (FERPA) and in part by the State of California Education Code. UCB maintains a campus policy governing disclosure of information from student records. This policy provides reasonable interpretations of those laws and protects the student’s right of privacy as guaranteed by the State of California’s constitution. For more information, the entire policy can be found at: http://registrar.berkeley.edu/ferpa.html

You must not release any private student information to any person or organization without the student’s written consent, and must only handle all UCB information for authorized work-related purposes, according to the Minimum Security Standards for Electronic Information (MSSEI).

Private student information is considered Level 1 and includes, but is not limited to, academic records, information in personnel files, student conduct issues, SID, certain personal contact information, as well as other sensitive information encountered while on the job. Level 2 information, which if exposed to unauthorized persons, causes extreme impact. It includes but is not limited to Social Security Numbers, Credit Card Numbers and medical information.

1. After you have logged in to Campus Solutions, click the Main Menu link at the top, left of the window.

   ![Main Menu](image)

   **NOTE:** Your menu view may be different from the example here, based on your security access and functions.
2. Scroll downwards, if necessary, and select **Reporting Tools**.

3. Click the **BI Publisher** link.

4. Click **Query Report Scheduler**.
The first time you run a BI Publisher report using Query Report Scheduler, you will use the Add a New Value page to create a new run control. Once a Run Control has been saved, however, it will be available for use time and time again and can be run as is or reconfigured. Run controls are specific to the user.

5. Once you have selected Query Report Scheduler, you will arrive at the Query Report Scheduler window and the Find an Existing Value tab.

6. Click in the “begins with” Run Control ID text box, and type all or part of an existing run control, such as we have done in the example to the right.
7. Click the **Search** button. Then the **Query Report Scheduler**'s run control parameters window appears for the associated report. (See **Step 8**.)

**NOTE:** If you type *part* of a run control, a list will appear from which you can select the desired run control ID.
8. Observe that the **Query Report Scheduler** window is reconfigured to display the query's parameters. From this window, you can choose the **Update Parameters** link before continuing.

Change the parameters, if necessary, and then click the **OK** button to return to the Query Report Scheduler window.
9. Back in the **Query Report Scheduler** window, note that the **Report Name** field is already populated. That is because that report has been previously saved to the run control ID you inputted in **Step 6**.

**NOTE:** In the **Report Name** text box, you could also search for a different report by clicking the Lookup list icon ( ), or typing the first few characters of the report name, and then select a different report from the list that appears.

Report Names and their scope can be found on the Berkeley reports homepage, called [The Reporting Page](http://sisproject.berkeley.edu/reporting/list).
10. Click the Run button.

11. After accepting the default configurations for Type and Format, or changing them, click the OK button.
12. Within the **Query Report Scheduler** window, click **Save**, if you have made any changes to the parameters you wish to keep (to be associated with the run control ID).

13. Click the **Process Monitor** link.
14. **Run Status** should equal **Success**, **Distribution Status** should equal **Posted**, and **Details** should equal **Details**. If not, click **Refresh** before continuing.

15. From the Navigation Bar, click the **Reporting Tools** link.

16. Select **Report Manager**.
17. Click the Administration tab.

18. Click the PDF of the report, shown in the Report List. (It should be the top report displayed.)

19. Once you select the PDF, that PDF file will appear in a new browser tab or window. Using the Acrobat command bar, you can save or print your report.
20. When done, close the report’s browser tab to exit the report.

21. Click **Home** to return to Campus Solutions’ home page, or **Sign out** to exit Campus Solutions.

**NOTE:** To completely exit Campus Solutions, exit your browser, as well, at the end of a browser work session. Do not leave your open browser unattended.

**Support:**
For questions or assistance, please contact Campus Shared Services IT:

- Call **510-664-9000** (press **option 1**, then **option 2** to reach SIS support)
- Email: itcsshelp@berkeley.edu
- Submit a ticket: [https://shared-services-help.berkeley.edu/new_ticket/it](https://shared-services-help.berkeley.edu/new_ticket/it)
