

## View ISIR Suspense Table

Students apply for financial aid by completing the Free Application for Federal Student Aid (FAFSA). The FAFSA is processed by the Department of Education, which sends electronic records once a day containing data necessary for the determination of financial aid eligibility to schools. These records are called ISIRs and must be matched and loaded to the correct student record in Campus Solutions (CS). ISIRs are loaded into the ISIR Suspense table.

Search/Match rules find matching student records in CS while a combination of ISIR Load Parameters and UCB custom ISIR Load rules determine whether to load an individual ISIR to an existing student record, skip the ISIR, or route it for manual review by setting the status to Suspend.

Matched records are moved into the ISIR Corrections tables (but remain viewable in the Suspense table), and the Load Status is set to "Loaded". This process initiates financial aid awarding at the student level. Data from loaded ISIRs (viewable in ISIR Corrections) is used in downstream financial aid processes such as Budgeting and Packaging

If no match is found, the ISIR transaction remains in the Suspense tables with a Load Status of either "Skip" or "Suspend", depending on which criteria is met.

In this exercise we will review 2 students in the ISIR Suspense pages. The first person has multiple Loaded ISIRs. The second person has one ISIR that has Loaded and one that is in Suspense.

- From the Main Menu, click the **Financial Aid** link. 

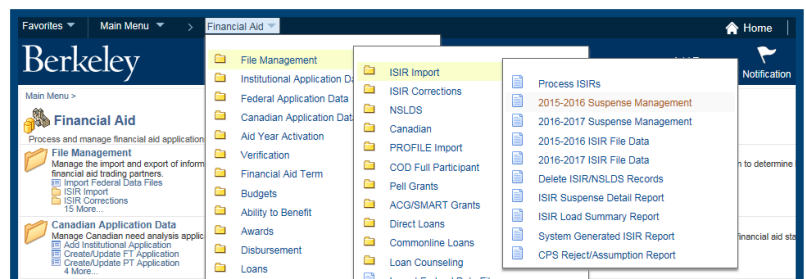

- Click the **File Management** menu.

- Click the **ISIR Import** menu.

- Click the **2015-2016 Suspense Management** menu

- There are multiple ways to search, but best practice is to use the Student ID number. Enter the student ID# in the **Empl ID** field.

Then click the Search button.

**ISIR Susp Management 15/16**  
Enter any information you have and click Search. Leave fields blank for a list of all values.

- Four ISIRs show for this person. The **Load Status** for each is “Loaded”. The **EC Queue Instance** is the batch that these applications came in. In this case, all 4 ISIRs came in the same batch 515. The Sequence Number is the order in the batch that the ISIRs came in. The higher the number is the most recent.

Search Results

View All

EC Transaction ID	EC Queue Instance	Sequence Number	Social Security #	Empl ID	Load Status	Name Code	Date of Birth	Last Name	Student's First Name	Load Action
CPS_ISIR_2016	515	19535	*****	261	Loaded	MI	****/****	MILLER		Ignore/Skip
CPS_ISIR_2016	515	19536	*****	261	Loaded	MI	****/****	MILLER		Ignore/Skip
CPS_ISIR_2016	515	19537	*****	261	Loaded	MI	****/****	MILLER		Ignore/Skip
CPS_ISIR_2016	515	19538	*****	261	Loaded	MI	****/****	MILLER		Ignore/Skip

- You can view ISIRs in any order, but it may make more sense to view them in order by batch (**EC Queue Instance**). Because all these ISIRs were in the same batch, in this case we may want to sort them in chronological order (**Sequence Number**) within the batch.

Search Results

View All

EC Transaction ID	EC Queue Instance	Sequence Number	Social Security #	Empl ID	Load Status	Name Code	Date of Birth	Last Name	Student's First Name	Load Action
CPS_ISIR_2016	515	19535	*****	261	Loaded	MI	****/****	MILLER		Ignore/Skip
CPS_ISIR_2016	515	19536	*****	261	Loaded	MI	****/****	MILLER		Ignore/Skip
CPS_ISIR_2016	515	19537	*****	261	Loaded	MI	****/****	MILLER		Ignore/Skip
CPS_ISIR_2016	515	19538	*****	261	Loaded	MI	****/****	MILLER		Ignore/Skip

You can sort any column by clicking the title. In this case, we clicked the **Sequence Number** column header to sort by the order they came in during batch 515.

**Sequence Number**

The lowest sequence number (e.g. 19535) is the earliest ISIR and the highest number (e.g. 19538) is the latest (most recent).

8. We can view the ISIRs in any order, but in this case we will start with the first ISIR (lowest Sequence number). Click anywhere in the row to open up an ISIR.

We have finished reviewing this person's ISIR information in the suspense table.

We are now ready to look at another person.

22. Click the **Return to Search** button.

23. Enter the Student ID number in the **Empl ID** field.

24. Then click the **Search** button.

25. The search results display below the search button.

This person has 2 ISIRs. In reviewing the **Load Status**, we can see that one ISIR has Loaded and the other is in Suspense. In looking at the **EC Queue Instance**, we can see that they came in two different batches. The higher the number, the later the load. In this instance, the ISIR that came in batch 512 has loaded, but the later ISIR that came in batch 518 is in Suspense. The Sequence Number is where in the batch the ISIR is, which is helpful if multiple ISIRs come in the same batch.
